OBJECTIVE

Full-Stack Developer with hands-on production experience building scalable systems using **Next.js**, **Node.js**, and **PostgreSQL**. I obsess over backend engineering, designing clean modular architectures, optimizing systems under real load, and understanding how things work at the infrastructure level. I integrate AI-assisted development into my workflow to move faster and own projects end-to-end, from API design through VPS deployment with **Docker** and **Nginx**. My goal is to grow into a backend/systems engineer who builds things that don't just work, but hold up.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES2024), C++, HTML5, CSS3

Frontend: React.js, Next.js 14 (App Router), Tailwind CSS, Shadcn/UI, Zustand, TanStack Query, React Hook Form, Zod

Backend: Node.js, Express.js, NestJS (familiar), REST APIs, JWT, NextAuth, Stripe (Webhooks), Socket.io, Nodemailer

Databases & ORM: PostgreSQL, MongoDB, Prisma ORM, Mongoose, Redis (Caching, Rate Limiting)

DevOps & Cloud: Docker, Docker Compose, Nginx (Reverse Proxy, Static Serving), GitHub Actions (CI/CD), VPS Deployment, Linux/Ubuntu, AWS (Exploring)

Tools: Git, GitHub, Postman, Swagger/OpenAPI, Cloudinary, Firebase

WORK EXPERIENCE

Betopia Group | Full-Stack Developer

Jul 2025 – Present

Dhaka, Bangladesh

- Designed and shipped **high-performance REST APIs** with **Node.js**, **PostgreSQL**, and **Prisma** in a **domain-driven modular architecture**, then added a **Redis read-through caching layer** that cut response latency by nearly 95% on key endpoints.
- Secured the platform with **JWT auth**, **RBAC**, and an idempotent **Stripe webhook pipeline** that protects every financial transaction against double-processing.
- Set up **production-grade CI/CD with GitHub Actions**, containerized services with **Docker**, and configured **Nginx** as reverse proxy for smooth, zero-downtime deployments.

UpSkill Digital Agency | Full-Stack Developer (Part-time)

Feb 2025 – Jun 2025

Dhaka, Bangladesh

- Delivered SEO-optimized full-stack applications using the **MERN stack** for agency clients, shipping 3+ projects on schedule.
- Integrated **Firebase** and **Clerk** authentication with route-based rendering in Next.js; shipped responsive, pixel-perfect UIs with Tailwind CSS and Shadcn/UI in close collaboration with designers.

PROJECTS

ClinicallyManic

🔗 Live | 🐙 GitHub

Next.js 14 · Node.js · Express · PostgreSQL · Prisma · Redis · Stripe · Docker · Nginx · NextAuth · React Query

- Implemented a **Redis cache-aside layer** cutting API response latency by nearly 95% (from about 50ms to 2ms); **PostgreSQL strategic indexing** reduced complex join execution time by nearly 80%.
- Architected a **triple-layer payment idempotency system** (Redis cache, SETNX lock, and DB unique constraint) with **Prisma ACID transactions**, ensuring no duplicate charges were recorded across all transactions in production.
- Optimized **multi-stage Docker builds**, shrinking image size from 1.25 GB to 128 MB (nearly 90% reduction) and cutting CI/CD build time by nearly 70% through layer caching.

Wasabi Gaming

🔗 Live | 🐙 GitHub

Next.js 14 · Node.js · Express 5 · MongoDB · Socket.io · Stripe · Cloudinary · Puppeteer · Docker · GitHub Actions

- Developed a **webhook-driven async processing pipeline** for third-party AI integration, streaming results in real time via **Socket.io** and validating every payload with **Zod** before DB writes to prevent malformed data from reaching the database.
- Configured **GitHub Actions CI/CD** with automated linting, testing, and SSH-based VPS deployment, cutting manual deployment effort by nearly 80% and enabling zero-downtime releases.

EDUCATION

Northern University Bangladesh | B.Sc. in Computer Science and Engineering

2023 – 2027

ACHIEVEMENTS & EXTRA

- LeetCode (100–120 solved):** Solved 100–120 Easy–Medium problems spanning arrays, strings, trees, and dynamic programming, sharpening algorithmic intuition and complexity analysis through consistent, disciplined practice.
- Technical Writing:** Runs an active Bengali-language DevOps & backend series on **LinkedIn**, covering Docker internals, system design, and CI/CD for the Bengali developer community.
